TIMELINE OF EVENTS

- Sept 14, 2026:** Samples submitted to Steep Hill Oklahoma (LAAA-NJT2-DMOG) for mandatory compliance testing.
- Sept 22, 2026:** Received official passing test documentation for both batches.
- Sept 23–28, 2026:** Delivered 7 orders across 7 dispensary locations (~50 total units sold to patients).
- Sept 29, 2026:** Internal compliance team discovered batch statuses changed to non-passing in state system without lab notification.
- Action Taken:** Notified OMMA and immediately executed a full voluntary recall/quarantine across all 7 dispensaries.

REGULATORY SAFEGUARDS & OPERATIONAL NEXT STEPS

Systemic Transfer Safeguards

State law strictly prohibits transfers without verified passing tests in the seed-to-sale system. Initial distribution occurred solely because the third-party lab uploaded passing results.

Quality Assurance Commitment

We are re-evaluating third-party testing partnerships and establishing heightened external verification workflows to ensure lab errors never affect patients or dispensary partners.
